Intelligent – Efficient – Sustainable

Delivery	Parcels and documents can be deposited in the locker easily and safely. Parcel post and parcel delivery companies can complete delivery without the recipient being present.
Receipt	Notification to the recipient by email and via the smartphone app. Open the parcel compartment using a pin code or automatically by mobile phone/Bluetooth.
Returns	Returns possible through the simple sending of a one-time pin code to the parcel collector.
Other system features	• Simple resident management by the property managers via the web portal. • Software functions can be expanded to existing systems at any time. • Parcel compartment sensors detect deposited parcels. • Registered residents with a smartphone and the app can be automatically recognised by the locker, which triggers the opening mechanism of the allotted parcel compartment. • Parcel compartments can also be permanently allocated in line with user requirements. • Available parcel compartments can be reserved for parcels to be deposited later on. • The buzzer can be integrated into the system display via a bell function. • And much more is in pipeline ...

Dimension	Sizes	Width	Height	Depth
	XS	310 mm	144 mm	400 mm
	S	310 mm	291 mm	400 mm
	M	310 mm	585 mm	400 mm
	L	623 mm	585 mm	400 mm
	XL	936 mm	879 mm	400 mm
