

DESIGN
BECOMS
FUNCTION

NUOVA
GENERAZIONE

DESIGN, FUNCTION AND QUALITY IN FULL COMPLIANCE WITH POSTAL REGULATIONS.

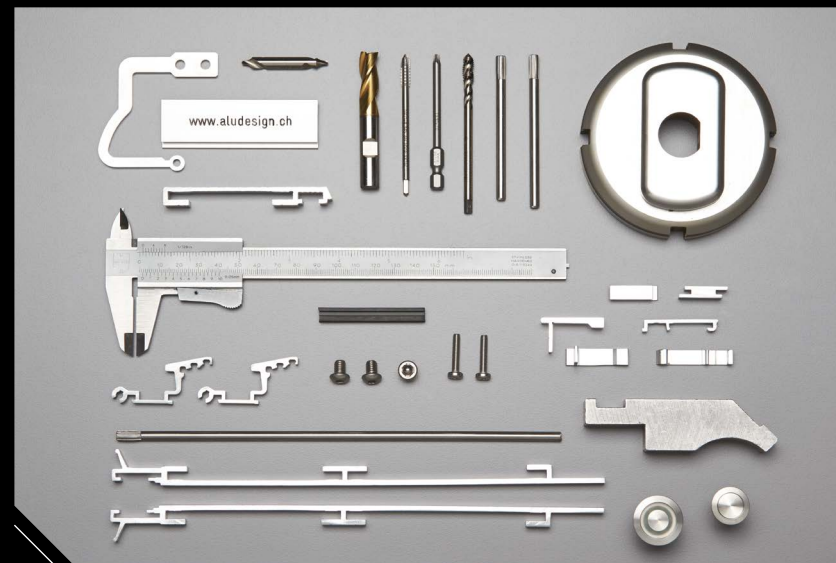

DESIGN

The horizontal lines are a consistent feature. By omitting the handle, a flat effect is achieved.

FUNCTIONALITY

The unique N bar (patented) allows great freedom when designing your letterbox label. The hidden letter flap coupling (patent pending) provides convenient access to the entire letter compartment.

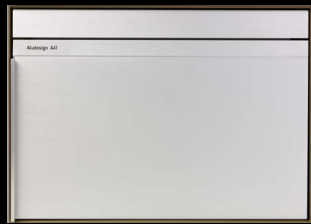

QUALITY

Durable thanks to high-quality materials! Housing made from 2mm Peraluman sheets. Doors made from extruded aluminium profiles. Highly weather-resistant powder coatings as standard.

MAXIMUM COMBINATION OPTIONS

FRONTS

1 (hidden lock)
A41 horizontal format
A31 narrow format

2 (visible lock)

CASING

5
S (standard 4 mm frame)

6
R (with rain shield)

7
Z (with 8 mm frame)

8
L (with lighting)

OPTIONS

15
N bar
The end-to-end N bar is used to label the letterbox and can be individually designed with different colours or added reversible signs such as «No advertising please».

16
INSTALLATIONS
Buzzer, light button, holes for intercom, cameras, movement detector, badge reader and lighting strip integrated into the housing can all be planned and fitted horizontally, vertically or as a complete compartment depending on your wishes.

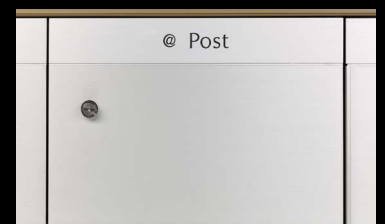

17
LOCKS
The letterbox is fitted with a cylinder lock as standard and comes with two keys. As an added option, the cylinder cutout can be adapted to the respective lock system.

18
SPECIAL COMPARTMENT
Flexible and personalised combinations of doors on the back of the housing, open tray, newspaper, paper, fire brigade and fire alarm system compartments, parcel box and removable intermediate shelves are all possible.

19
MOUNTING TYPES
The letterboxes are mounted on side supports or a central support. Wall mounting or fitting into recesses is also possible.

20
PARCEL BOX
The parcel box facilitates delivery of your parcels by Swiss Post when you're not in. It can be locked using a badge, meaning your large parcels are stored away safely until you empty the box.

The ALUDESIGN colour collection consists of 16 colours as well as the 4 most popular colours right now, which are displayed on our homepage. Upon request, we can also accommodate other colours or chrome steel casing.

The colours shown are not binding for print-related reasons. Deviations are possible. The printed RAL swatches are representative of the colours.
